

Interviewer: Thanks for joining. Let's start with a technical deep-dive ? tell me about a challenging project you've led recently.

Candidate: I built a Kafka pipeline for payments at about two million events per second

Candidate: Back-pressure was the hard part we throttled producers using consumer lag metrics

Candidate: We aimed for 99.95 percent uptime measured in Prometheus

Candidate: I rolled back the deploy even when engineers disagreed

Candidate: I wrote a blameless post-mortem the next day

Interviewer: That's a solid foundation. How did you handle back-pressure when the pipeline fell behind?

Interviewer: That's a solid foundation. How did you handle back-pressure when the pipeline fell behind?

Interviewer: That's a solid foundation. How did you handle back-pressure when the pipeline fell behind?

Interviewer: That's a solid foundation. How did you handle back-pressure when the pipeline fell behind?

Interviewer: That's a solid foundation. How did you handle back-pressure when the pipeline fell behind?

Interviewer: That's all the time we have. Thanks for walking me through your work ? you'll get a feedback report shortly.
